I am asking you, the FCC, to kindly reject the NAB's petition 04-60. Being in a small town, the variety and quality of the local stations is very limited. I find that all my music tastes can be satisfied by satellite radio and I find the news and weather broadcasts to be excellent. Since I am having to pay for this entertainment, I do not see how the NAB could have any influence over satellite radion. Perhaps they just don't know how to deal with competition that is "outside their box".
